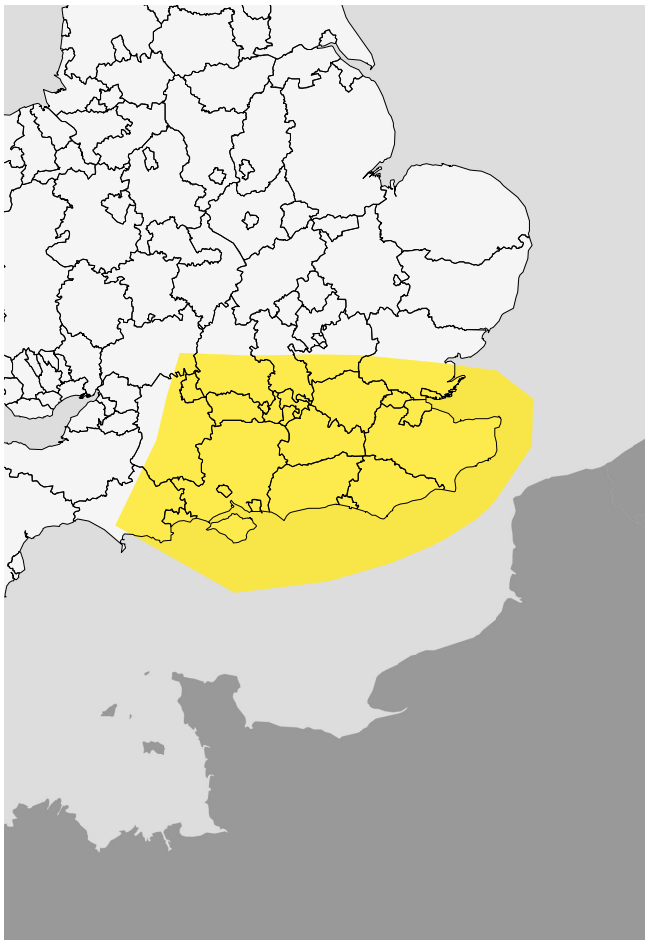
Yellow warning
Rain

Between
23:00 Sat 30 Oct 2021 and
15:00 Sun 31 Oct 2021



A short period of heavy rainfall and squally winds may bring some localised flooding and transport disruption.

What to expect

- Flooding of a few homes and businesses is likely
- Bus and train services probably affected with journey times taking longer
- Spray and flooding on roads probably making journey times longer
- Possible localised damage due to squally winds.

Further details

A band of rainfall will continue eastwards across southern England, clearing from Essex and Kent by late afternoon.

Some locations will see 20-30 mm of rainfall within 2 or 3 hours, perhaps a large proportion of this in less than an hour. This will be falling on near-saturated ground, so is likely to cause surface water flooding in places.

Strong winds will gust into the 40s of mph for many, but in a few places they may exceed 60 mph very briefly. This would cause some additional disruption and damage to trees, and adds to the very poor travelling conditions.

✓ Medium likelihood of low impacts
